

# WASTE - O- CRAFT

## SURAVI

**GIET GHANGAPATNA,BBSR**

**Team Size: - 1-4**

- You are required to make a model (EITHER working or non-working) from waste materials like plastic and plastic products, match-box, sticks, glass, paper, wires, e-product or any unutilized waste etc.
- The main objective is to make proper use of wastage product in a proper way with engineering approach which should be more attractive and effective.
- Take any day-to- day used things and recycle it (e.g. cans, matchboxes, used pens and refills etc.)
- The model should relate either technical or non-technical topics.
- No materials will be provided.
- The judgment will be based on the creativity and neatness.
